

XtractMAX HF-320 High-Flow, Portable Dual-Filter Vacuums

Fine Powder

- X Exclusive 320 CFM Brushless Motor - Rated For Over 4000 Hours Use**
- X 36.7 Sq Ft Primary Filter Area - 99.9% Efficient to .5 Microns**
- X Exclusive 5 Year Filter Warranty!!**
- X 2-Stage Filter System Protects Motor for Longer Operating Life**
- X 20-Gallon Storage Tank**
- X Quiet Operation Under 80 dBA**
- X Filter Shaker For Instant Filter Rejuvenation**
- X Plug-n-Go Operation 120/1/60**
- X Soft Non-Scuff Wheels**
- X All-Welded Steel Frame & Powdercoat Finish For All-Weather Durability**
- X Accepts 1.5", 2" & 3" Hose Up To 100' Long**

Xtract[®] MAX

CERTIFIED DUSTLESS

High-Flow 320 Floor Finishing Vacuums

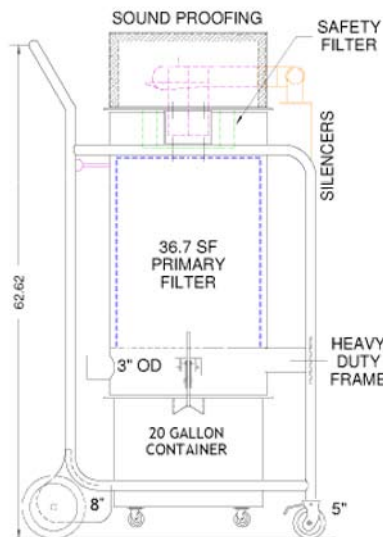

These rugged plug-n-go electric vacuums are engineered for fast and effective capture of toxic dust generated in hardwood floor sanding operations, concrete polishing, grinding and more.

Designed and built for the professional contractor, these powerful high-flow vacuums feature a brushless single-phase 4000-hour motor. *That's five times the rating of a standard carbon-brush shop vacuum!*

And these floor sanding vacuums also feature an amazing *double* the vacuum suction power, with an incredible 320 CFM airflow.

***Greater suction power,
longer continuous operation
and more effective filtration
than any other
floor finishing vacuum
on the market***

Exclusive 2-Stage Filter

Our revolutionary two-stage filter system ensures dust-free hardwood floor sanding and concrete polishing and grinding with 36.7 square feet of filter surface in the primary 5-Year Tetratek bag-style filter — 99.9% efficient at capturing dusts as small as .5 microns.

A secondary cartridge filter traps particulate down to 1 micron and can be easily upgraded to a true HEPA filter. This vacuum offers 3 to 5 times the filter surface area of any other hardwood floor sanding vacuum on the market today!
